

Since the last meeting we had paused training for a short time but now all course have resumed. During this time a few personnel remained working for medical and administration purposes. Now that training has recommenced all sections have implemented new working procedures to ensure that social distancing is adhered to where possible.

You may have noticed we are night flying at the moment. This started on 03 July and was meant to only be for three weeks however we expect this to be extended due to the weather.

Families day and all other events have been cancelled this year. We will let you know when we start again.

As you are aware The Wrekin Gliding club have started using RAF Shawbury. The club operates 5 gliders; 4 are aero-tow and one is a motor glider that is used as the tug aircraft. The motor glider is powered by an extremely quiet 1500cc turbo charged and silenced engine that is 25 times quieter than a normal powered aircraft. If you have any questions please either give me a call or send me an email and I will get back to you. There are also some details in The Aries Magazine which I will send out soon.

If you have any more queries then please let me know.

Kind Regards

Sarah
